MEDICINE FOR AGRICULTURAL GROWTH & INTEGRATED CROP CONSERVATION

Vaidic Srijan LLP's "Sustainable Agriculture Solution: MAGICC®"

- **Agriculture**
- **Aquaculture**
- **Horticulture**
- **Animal Husbandry**

Vaidic Srijan LLP has developed MAGICC®,

The Medicine for Agricultural Growth and Integrated Crop Conservation, which is a herbal medicine for resurrection of the native ecology of Soil, Water and Air, through the farm Waterbodies. The rejuvenated Water gets transformed into neuro-immuno booster for plants and animals, resulting diseases, pests and weather resilient farms of Agriculture, Aquaculture and Animal husbandry reducing the input cost and multiplying the yield.

1. We 1st rejuvenate Water in the farm Waterbody (existing or newly created),
    a. To transform Water to neuro-immuno booster for flora & fauna.
    b. The rejuvenated aqua-ecology creates an apt environment for the aquatic life,
    c. which has a ripple effect on avian population,
    d. due to which greenery is spread on the embankment region
    e. so that bees and butterflies are back
    f. This ensures better pollination resulting into better crops
2. Rejuvenation of Water, is to make it potent for Agriculture, Aquaculture and Animal Husbandry too
3. Using this Water in Symbiotic integral farming to boost up the soil ecology using highly potent and oxygenated Water on plants.
4. Supplying oxy-rich and nutrient balanced Water to boost up the plant immune system through foliar spray only, saving up to 90% of the Water used in irrigation
5. Building a chemical free farm without fertilizers, insecticides, pesticides, weedicides or fungicides
6. Making the farm go diseases, pests and weather resilient
7. Reducing the input cost and multiplying the output (both quality & quantity from the 1st crop cycle itself)
8. The agri-waste is also high-quality fodder, being chemical free and nutrient rich.
9. The rejuvenated Water is also neuro-immuno booster for the animal farms, making the farms reduce the medicinal expenses and the animals healthy. Animals are given the same Water to drink and are given bath by the same Water. Even the shed is washed by the same Water.
10. Overall boosting the rural economy through making Agriculture, Aquaculture and Animal Husbandry – a profitable, low input and high output enterprise.
